SKILLS

Digital Marketing

- Content Marketing • Social Media Marketing
- Brand Visibility • Online Promotion

SEO, AEO & GEO

- On-Page SEO • Off-Page SEO • Technical SEO
- Keyword Research • Search Intent Analysis
- Content Strategy • AEO • GEO

AI-Powered Development

- AI-Assisted Coding • Code Generation
- Debugging • Website Prototyping

Frontend Development

- Next.js • React • Tailwind CSS
- HTML5 • CSS3 • JavaScript

Backend Development

- Python • Node.js • Express.js

Databases & Backend Services

- MySQL • Supabase • Firebase

AI Tools & Technologies

- ChatGPT • Gemini • Claude • Lovable
- Canva • Runway • Kling AI • Pika
- CapCut • Adobe Premiere Pro

Professional Skills

- Analytical Thinking • Problem Solving
- Creativity • Communication • Teamwork
- Adaptability • Time Management

MUHAMMAD ASHIQ S

AI DIGITTAL MARKETING SPECIALIST | SEO, AEO & GEO | AI-POWERED CONTENT CREATION & FULL-STACK DEVELOPMENT

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with practical experience in AI-assisted digital marketing, SEO-optimized website development, AI-powered content creation, and full-stack development. Knowledgeable in On-Page SEO, Off-Page SEO, Technical SEO, keyword research, search intent analysis, competitor research, and website content optimization. Skilled in developing keyword-focused content, optimizing page titles and meta descriptions, structuring headings, improving internal linking, and organizing website information to support search engine visibility and user experience.

Familiar with technical SEO fundamentals, including responsive website design, website structure, crawlability, indexability, URL optimization, page performance, and mobile usability. Understands AEO (Answer Engine Optimization) and GEO (Generative Engine Optimization) principles for creating clear, authoritative, context-rich content suited to answer engines and AI-powered search experiences. Experienced in using AI tools for content creation, prompt engineering, website prototyping, code generation, debugging, and development workflows. Familiar with Next.js, React, Tailwind CSS, JavaScript, Python, Node.js, and database technologies. Combines technical development knowledge with AI-driven marketing strategies to improve online discoverability, strengthen brand communication, and support business growth.

CORE SKILLS

- **Digital Marketing**
  - Content Marketing
  - Social Media Marketing
  - Brand Visibility
  - Online Promotional Content
- **SEO, AEO & GEO**
  - On-Page SEO • Off-Page SEO
  - Technical SEO • Keyword Research
  - Search Intent Analysis
  - Content Strategy • AEO • GEO
- **AI-Powered Full-Stack Development**
  - AI-Assisted Coding • Code Generation
  - Debugging • Website Prototyping
  - Development Workflow Optimization
- **Frontend Development**
  - Next.js • React • Tailwind CSS
  - HTML5 • CSS3 • JavaScript
- **Backend Development**
  - Python • Node.js • Express.js
- **Databases & Backend Services**
  - MySQL • Supabase • Firebase
- **AI Tools and Technologies**
  - ChatGPT • Gemini • Claude • Lovable
  - Canva • Runway • Kling AI • Pika
  - Luma Dream Machine • HeyGen • DALL·E
  - CapCut • Adobe Premiere Pro
- **Professional Skills**
  - Analytical Thinking • Problem Solving
  - Creativity • Communication • Teamwork
  - Adaptability • Time Management

AI TOOLS AND TECHNOLOGIES

AI Assistants & Development Platforms
ChatGPT, Gemini, Claude, Lovable

AI Content & Creative Tools
Canva, Runway, Kling AI, Pika, Luma Dream Machine, HeyGen, DALL·E

Video Editing
CapCut, Adobe Premiere Pro

Web Technologies
Next.js, React, Tailwind CSS, HTML5, CSS3, JavaScript, Python, Node.js, Express.js

Databases & Backend Services
MySQL, Supabase, Firebase

AI-Assisted Development
Prompt engineering, Code generation, Debugging assistance, Website prototyping, Code refinement

SEO & Website Optimization
Keyword research, On-page optimization, Off-page SEO, Technical SEO, Metadata optimization, Content structure, Search intent analysis

KEY SEO TOOLS

- Google Search Console
- Google Analytics 4
- Google Keyword Planner
- Ahrefs
- SEMrush
- Screaming Frog
- PageSpeed Insights

AI TOOLS & PLATFORMS

AI Assistants & Development Platforms

- ChatGPT • Google Gemini
- Claude • Lovable

AI Content & Creative Tools

- Canva • Runway • Kling AI • Pika
- Luma Dream Machine • HeyGen • DALL·E

Video Editing

- CapCut • Adobe Premiere Pro

Web Technologies

- Next.js • React • Tailwind CSS
- HTML5 • CSS3 • JavaScript

Backend Technologies

- Python • Node.js • Express.js

Databases & Backend Services

- MySQL • Supabase • Firebase

AI-Assisted Development

- Prompt Engineering • Code Generation
- Debugging Support • Website Prototyping

SEO & Website Optimization

- Keyword Research • On-Page Optimization
- Off-Page SEO • Technical SEO
- Metadata Optimization • Content Structure
- Search Intent Analysis

PROFESSIONAL SKILLS

- Analytical Thinking
- Problem Solving
- Creativity
- Communication
- Teamwork
- Adaptability
- Time Management

PROJECTS

1 Invendo AI Academy — Corporate AI Training Website

Focus: SEO, AEO, GEO, Keyword Research, Content Strategy, AI-Assisted Website Development

- Plan website information architecture and content for a corporate AI training business.
- Research relevant keywords and map them based on search intent.
- Apply On-Page SEO (title tags, meta descriptions, headings, internal linking, keyword placement).
- Explore Off-Page SEO (backlink research, competitor analysis, brand visibility).
- Consider Technical SEO (site structure, mobile usability, crawlability, indexability, URL optimization).
- Structure answer-focused content, FAQs, and clear explanations for AEO and GEO.
- Use AI tools for keyword research, content planning, drafting, editing, and website development.

2 Green Arch Builders — SEO-Optimized Business Website

Technologies: Next.js, Tailwind CSS, JavaScript, Supabase
Focus: Web Development, SEO, AEO, GEO, Content Optimization

- Designed and developed a responsive website for a construction and architecture company.
- Used AI tools for planning, code generation, debugging, and content creation.
- Researched business keywords aligned with user search intent.
- Developed keyword-focused content, headings, and service descriptions.
- Applied On-Page SEO (metadata, headings, internal linking, content organization).
- Considered Technical SEO (responsive design, URL structure, crawlability, mobile usability).
- Organized information into clear, question-focused content for AEO and GEO.
- Used Tailwind CSS for responsive layouts and structured service/project content.

3 Personal Portfolio Website

Technologies: React, HTML5, CSS3, JavaScript, Supabase
Focus: Web Development, AI-Assisted Coding, Responsive Design, SEO-Friendly Content

- Developed a responsive portfolio to showcase skills, projects, education and experience.
- Used AI tools for code generation, debugging, and content preparation.
- Organized project descriptions with clear content hierarchy and navigation.
- Applied responsive design principles and SEO-friendly content organization.
- Focused on usability, maintainable code and professional online presence.

4 RationKart — Public Distribution System Application

Technologies: React, Native, JavaScript, Firebase
Focus: Mobile Application Development, Authentication, Database Integration

- Worked on a mobile application concept for ration booking, stock management and doorstep delivery.
- Explored Firebase authentication and role-based functionality.
- Worked on application workflows to support customer and delivery operations.
- Strengthened programming, application design, analytical thinking and problem-solving skills.

5 Highway FR Detection Web Application

Technologies: Python, FastAPI, React.js, YOLO, OpenCV, SQLite, REST API
Focus: AI-Powered Video Analysis, Object Detection, Face Detection, Web Application

- Developed an AI-powered web app for highway video analysis using computer vision.
- Implemented video upload, validation and automated processing workflows.
- Integrated YOLO for vehicle and person detection in video frames.
- Implemented face detection and automatic face snapshot generation for review.
- Processed frames using OpenCV and generated annotated video outputs.
- Built REST APIs using FastAPI to manage uploads, jobs and detection results.
- Stored metadata, timestamps and file paths using SQLite and local storage.
- Enabled users to review processed videos, snapshots and processing history via web interface.

6 AI-Based Question Paper Generation Web Application

Technologies: React.js, Node.js, Express.js, MongoDB, OpenAI (or AI/NLP)
Focus: AI/NLP, Question Generation, Question Bank, Exam Customization

- Automated question generation from study materials using AI/NLP.
- Supported customization based on subjects, topics, difficulty levels and question types.
- Managed question bank for easy retrieval, reuse and paper creation.
- Automated paper assembly by combining selected or generated questions.
- Handled input data, generation requests and application logic through backend processing.
- Built a user-friendly interface to simplify the question paper creation process.
- Streamlined exam preparation and reduced manual effort for educators.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering
Younus College of Engineering and Technology, Kollam, Kerala
(2022 – 2026)

Higher Secondary Education (12th Grade)
Government Model H.S.S., Vettikavala P.O., Kottarakkara, Kerala
(2019 – 2021)

SSLC (10th Grade)
St. Mary's HSS, Kizhakekkara, Kottarakkara, Kerala
(2018 – 2019)

INTERNSHIPS & WORKSHOPS

Android Application Design and UI/UX Design
Kochi | May 2025 – June 2025

- Learned Android design principles and UI/UX concepts.

ICT Academy of Kerala — Machine Learning Workshop
Trivandrum | July 2024

- Gained practical exposure to machine learning, data analysis and model optimization.

Embedded Systems and Robotics Intern
Kochi | May 2023

- Gained foundational exposure to embedded systems and robotics concepts.

CAREER OBJECTIVE

To contribute to an AI Digital Marketing, SEO, or AI-powered content marketing role by combining search engine optimization, keyword research, AI-assisted content creation, AEO, GEO, and full-stack development knowledge. Aim to develop search-friendly websites, create valuable digital content, strengthen online brand visibility, and support data-informed marketing strategies that contribute to sustainable business growth.
